Copy the answer file into the image into the \Windows\Panther folder, and name it unattend.xml. The Panther folder is one of the folders where Windows searches for an answer file. Create the folder if it doesn't exist. If there's an existing answer file, replace it or use Windows System Image Manager to edit/combine settings if necessary.

Answer files (unattend.xml) | Microsoft Docs

You can associate this WDS client unattended answer file with boot images of a specific architecture via the properties of the WDS server in the WDS console. Navigate to the Client tab. Select the option Enable Unattended Installation. Click the Browse button to find and select the unattended answer file (s) in the WDSClientUnattend folder.

Using Unattended Answer Files with WDS - Windows 7 Tutorial

Windows System Image Manager is the tool used to create an unattended Windows Setup answer file. Windows AFG, however, does not need the Windows Automated Installation Kit or Windows Assessment and Deployment Kit to be installed or downloaded. Windows AFG provides a simple web based form that gives the user options to configure the desired answer file; which is all based off Windows SIM.

Windows Answer File Generator

Instead you receive "The unattended answer file contains an invalid product key" message thus halting installation. Let me be clear, the initial Windows 7 installation from the Windows 7 Upgrade disc worked perfectly when upgrading from Vista.

Reinstalling Windows 7 & "The unattend answer file ...

The core setup of Windows 7 can be automated by creating an answer file, the Unattend.xml file. The Unattend.xml for Windows 7 (and Vista/2008/2008R2) are divided into sections, or configuration passes. This is because different parts of the setup are reading settings from different passes.

Back to basics - Understanding Unattend.xml automation in ...

Type Windows System Image Manager into the Windows 7 menu search bar and open it. In the bottom left Windows Image panel, right-click and insert the install.wim that is located in the sources subdirectory of the installation disk's root directory. Then right-click the central panel and create a new answer-file.

Automated Windows 7 Installation with an Autounattend.xml File

Because this answer file is cached, when you run the Sysprep command, the system applies settings in the cached answer file. If you use the settings in a different answer file, you can specify a separate Unattend.xml file by using the Sysprep /unattend:<file_name> option. For more information, see Sysprep Command-Line Options. For more information about how to use an implicit answer-file search, seeWindows Setup Automation Overview.

Use Answer Files with Sysprep | Microsoft Docs

In a previous post we went through creating and deploying language packs there was an additional step to create a Windows 10 answer file, I though it might be helpful to do a post on creating a basic answer file using Windows System Image Manager (SIM). First step is to install Windows Assessment and deployment kit (ADK).

Create Windows 10 Answer file TheSleepyAdmins

Output. You may choose to create the autounattend.xml file automatically by clicking "Download File" link below, or doing it the manual way. Ensure you select all the text below and copy to a word processor. Paste all the code and select "Save As...". Name the file "Autounattend.xml" without the quotations. Place this file in the root of a USB drive and come back to a fresh install of Windows 10.
