The Akai S1000 is a 16-bit, 44.1 kHz professional stereo digital sampler, released by Akai in 1988. The S1000 was among the first professional-quality 16-bit stereo samplers. Its abilities to splice, crossfade, trim, and loop sound in 16-bit CD quality made it popular among producers in the late 80s through to the mid 90s.

The Akai S3000XL is a sampler with 32 polyphonic voices, and 2 MB of built-in RAM.. For adding sounds to the sampler, the S3000XL features a 3.5" floppy drive that reads Akai-formatted floppies, and a SCSI port to link with an external storage device, such as a zip drive, a CD reader or an external hard disk for storage of longer, or more samples. The built-in 2 MB of RAM can be upgraded up to ...

Akai's great sampler of the late eighties! It actually still stacks up pretty well even today! A 16-bit, 22kHz to 44.1kHz sampler with 2MB to 32MB of RAM. Editing and programming the S1000 is a very good precursor to the advanced S3000 series. There are lots of advanced edit capabilities for looping, truncating, sample merging, time comp/exp ...

~~Akai MPC Live II review | Engadget~~

Akai's S20 Stereo Phrase Sampler starts out looking like a table-top version of the lackluster S01. Major improvements include STEREO input and outputs and far greater memory expansion (up to 17 MB) and of course, the sequencer. The standard 1 MB can sample between 7 to 56 seconds. Upgrading to 17 MB lets you sample from 131 seconds (Stereo 32kHz) to 1048 seconds (Mono 8kHz)!

Abstract. We review the present theoretical understanding of hyperfine interactions in metals and metallic alloys and report about density functional calculations of hyperfine fields, isomer shifts, electric field gradients and T₁-relaxation times. Most emphasis is put on calculating and understanding the trends of the hyperfine interactions for a large class of systems, especially for dilute ...

Recently, an excellent review of these developments has been given by Akai et al. [1]. Calculations of hyperfine parameters for transition metal and rare earth nuclei in complex systems, with large unit cells, were performed by Coehoorn et al. [2,3].
