AP Statistics — Chapter 4 Notes: Designing Studies Page 3 of 3 Principles of Experimental Design The basic principles for designing experiments are as follows: 1. Comparison. Use a design that compares two or more treatments. 2. Random assignment. Use chance to assign experimental units to treatments. Doing so

AP Statistics Chapter 4 Designing Studies 4.1: Surveys and ...

1. Comparison. Use a design that compares two or more treatments. 2. Random assignment. Use chance to assign experimental units. Create roughly equivalent groups of experimental units by balancing the effects of other variables among the treatment groups. 3. Control. Keep other variables that might affect the response the same for all groups. 4. Replication.
