If the argument is invalid, game over. The argument is bad and you're done. And the best way to show that an argument is invalid is by providing a counter-example, a situation in which the premises are true and the conclusion false. If the argument is valid, you need to proceed to the next step and see if it is sound.

A critical thinker examines a situation from all dimensions before making his or her final decision. The speaker will also analyze every situation using his strengths. Critical thinking also promotes ethical behaviors. The speaker will also use valid arguments and facts before presenting his or her findings to the audience.
