New York State Office of General Services

Management Management procurement is a method where construction work is completed using a series of separate works or trade contracts which the main contractor is responsible for managing. The contractor does not actually do the physical work but is paid a sum for managing the project through the various works packages.

Management – The Joint Contracts Tribunal

Procurement management in construction follows a logical sequence. First, you should plan what you need to contract; then you plan how you’ll do it. Next, you have to send out your contract requirements to sellers. They bid for the chance to work with you. You pick the best one, and then you sign the contract with them. Once the work starts, you monitor it to make sure that the contract is being followed.

Project Procurement Management in Construction | Biblioteka

Every procurement management process involves several elements, including requirements determination, supplier research, value analysis, raising a purchase request, reviewal phase, conversion to purchase order, contract administration, monitoring/evaluation of received order, three-way matching, payment fulfilment, and record keeping.
