a change in an object's position relative to a reference point how far an object travels along its path the distance and direction of an object's change in position from the starting point the distance an object travels per unit of time Review Vocabulary Use a dictionary to define position with its scientific meaning.

~~017 028 CH02 SN 896279 3/29/10 10:47 PM Page 17 User 040 ...~~
distance and direction from the reference point. Describing your location in this way defines your position. In the first example, the distance is one meter. The direction is to the left, and the reference point is your friend. In the second example, the distance is two houses. The direction is north, and the reference point is your school.
